PROFESSIONAL EXPERIENCE

Self-employed, Thailand

iOS & tvOS developer

02/2016 – present

Currently I work on 2 of my own projects, while living in Thailand. I'm making a Bomberman game for tvOS using Apple's SpriteKit framework. I also create a Thai alphabet practice app for iOS. I hope to release these apps before October 2016.

Ahold, Zaandam, The Netherlands

Freelance iOS Software Developer

05/2014 – 01/2016

At Ahold I worked on the Ahold tablet app. I've also maintained the codebase for the Appie Phone app and implemented an automated testing suite for the tablet app using Calabash.

Mobowski, Dordrecht, The Netherlands

Mobile Developer

07/2012 – 05/2014

I was hired again by Mobowski to build a apps, but this time tailor made apps for customers, since the white label app was hard to sell to potential clients. At Mobowski I created mostly native iOS apps using either Objective-C or C# (with Xamarin). I also built 2 small Android apps with Java.

Sound of Data, Rotterdam, The Netherlands

iOS Software Developer

04/2011 – 07/2012

At Sound of Data I was responsible for creating a framework for travel applications. Most important functionality delivered was the possibility to book flights. While at Sound of Data I also provided guidance for junior iOS and Android developers and maintained the CheapTickets application that was originally developed by another Dutch company on behalf of Sound of Data.

Mobowski, Dordrecht, The Netherlands

iOS Software Developer

07/2010 – 04/2011

Mobowski had tasked an Indian company to create an iOS framework for apps. I was hired to complete the work of the Indian company for the first release. I was also tasked with writing custom apps for clients.

Webstate, Utrecht, The Netherlands

iOS Software Developer

03/2009 – 07/2010

At Webstate I had the opportunity to start learning development for iOS devices while working on real-world projects. I was hired because I had experimented with Mac OS X development at home and as such I knew the basics of the language used for iOS development.

Lucrasoft B.V., Hendrik-Ido-Ambacht, The Netherlands

.NET Software Developer

10/2005 – 08/2007

At Lucrasoft B.V. I created software for small- and medium-sized businesses with Microsoft's .NET framework.

Nationale Nederlanden, Rotterdam, The Netherlands

Lotus Notes Developer

05/2004 – 10/2005

Within Nationale Nederlanden I developed software with Lotus Notes for internal use only.

ING Bank N.V., Amsterdam, The Netherlands

Documentum WebPublisher Developer

07/2001 – 05/2004

Worked mainly with XML, XSLT and HTML for this job. WebPublisher makes use of XSL templates to generate HTML pages for use on the intranet of ING. For me it was an introduction into a functional style of programming, since I was responsible for creating the XSL templates and XSL can be regarded as a functional programming language.

EDUCATION

Haagse Hogeschool, The Hague, The Netherlands

Computer Science

2008 – 2009

A continuation of the study started in 2001.

Erasmus University, Rotterdam, The Netherlands

History

2007 – 2008

After a few years of working as a .NET developer I decided to go back to studying and history peaked my interest.

Haagse Hogeschool, The Hague, The Netherlands

Computer Science

2001 – 2004

At the Haagse Hogeschool I followed a dual course which was based on a collaboration between the Haagse Hogeschool and the ING Group N.V.

Hogeschool Rotterdam & Omstreken, Rotterdam, The Netherlands

Computer Science

2000 – 2001

My introductory year of computer science was followed at this university, at the end of the year I had the opportunity to follow a dual course at the Haagse Hogeschool.

PROGRAMMING

Language	Understanding	Remarks
Objective-C	excellent	
C#	excellent	At Mobowski I developed several apps in C#.
Visual Basic	excellent	
Swift	good	For my Bomberman game I've started to use Swift.
Ruby	good	Mainly used for Calabash automated UI testing.
SQL	good	Used different dialects on different platforms.
HTML, XML, XSLT	good	
LotusScript	good	
Java	basic	I've used Java in some basic Android apps.
C	basic	I am teaching myself C as a hobby.
Scheme	basic	I am teaching myself Scheme as a hobby.
Python	basic	Used with Django to create a basic site.
Tools	Understanding	
Xcode	excellent	
Visual Studio	excellent	
Jenkins	good	
Bash scripting	good	
Calabash (automated UI Testing)	good	
Git	good	
Subversion	good	
Jekyll	good	
Eclipse(Android)	basic	
Mercurial	basic	
Photoshop	basic	

At both Sound of Data and Ahold I've worked with the SCRUM methodologies.

CERTIFICATIONS

Microsoft Certified Professional (Microsoft), Lotus Notes Domino Application Security & Workflow (AppliGate), Lotus Notes Domino Designer Fundamentals (AppliGate), Documentum Content Server (DELT), Documentum WebPublisher for Web Developers & Web Administrators (DELT), Functional English (ITA).

LANGUAGES

A good understanding of both Dutch & English (spoken & written). A basic understanding of German & French, since it was taught to me at secondary school, but I haven't used both languages in practice for many years. I am learning Thai at the moment while living in Thailand.
